

Prospectus

Applied Mining Geology

Geological Mapping

Who should attend?

This course is aimed at assisting new Geology Graduates with application of the theory and knowledge gained at tertiary institutions. As part of their graduate development programme, this particular course will help the Graduate with geological mapping and plotting as carried out and required at the mining operation.

Course outcomes

On completion of the course, the candidate will be able to:

- Demonstrate the understanding required to undertake geological mapping,
- Plan and prepare to undertake a geological mapping exercise,
- Carry out the data acquisition during a geological mapping exercise,
- Plot and document the geological data recorded during the geological mapping exercise,
- Interpret the data,
- Communicate the information.

Entry Requirements

BSc Geology Degree

Course Duration

5 days
